SERVICES OVERVIEW

Our SAP IBP services

We lead SAP IBP planning programmes end to end, from scoping to run, while your business keeps delivering.

25	100%	16 wks
SAP IBP professionals	SAP IBP certified	to go live

A FOUR-STAGE PATH

De-risk every decision before the next one

STAGE 01

Initiation

See SAP IBP on your own issues.

A detailed demonstration of the latest SAP IBP capabilities, mapped to your planning challenges and maturity.

STAGE 02

Proof-of-Concept

Validate fit before you invest.

Your customer-specific scenarios run in our SAP IBP system, with your data and your key users.

STAGE 03

Implementation

In production in as little as 16 weeks.

Design, configuration close to standard, data migration, training and cutover planned around your business calendar.

STAGE 04

Support

Business-critical processes secured 24/7.

Tailored application maintenance, release upgrades and continuous improvement after go-live.

WAYS TO WORK TOGETHER

An engagement model that fits

Fixed-scope delivery
A committed scope, timeline and budget, with one accountable Logiq team.

Co-managed programme
We steer alongside your teams and transfer know-how as the project runs.

Expertise on demand
Senior SAP IBP consultants to strengthen your team when and where needed.

SCOPE

SAP IBP modules covered

IBP for S&OP
One shared plan across finance, sales and supply chain

IBP for Demand
Statistical forecasting and demand sensing

IBP for Response & Supply
Supply, production and allocation planning

Supply Chain Control Tower
End-to-end visibility, alerts and KPIs

Let's discuss your planning project

Tell us where you stand; a senior consultant will get back to you.
